# SUBJECT INDEX

Alkanethiols
The adsorption of alkanethiols on gold studied quantitatively by XPS inelastic background analysis 141
Alkyl pseudohalides
HeI photoelectron spectra of alkyl pseudohalides 159
Aluminium
Theoretical investigation of the Auger spectra of Mg in different local atomic environments. Part 1. Magnesium and aluminium 199
Auger parameters
The use of the oxygen Auger parameters in the characterisation of oxygen-containing compounds 105

Bethe-ridge conditions
$(e,2e)$ ionization of helium leading to the $n=2$ final state under asymmetric Bethe-ridge conditions 17
Boron trihalides
A photoelectron spectroscopic study of the electron donor–acceptor complexes of trimethylamine with boron trihalides $BX_3$ (X = F, Cl, Br) 129
Buspirone analogues
Studies of electronic structures of buspirone analogues by means of photoelectron spectroscopy 177

Charge transfer satellites
Charge transfer satellites and multiplet splitting in X-ray photoemission spectra of late transition metal halides 325
CI calculations
CI calculations of the inner and outer valence photoelectron spectra of the fourth row hydrides 375
Cobalt particles
XPS and scanning tunneling microscopy studies of oxidized cobalt particles on graphite 359
Copper oxide based compounds
The fine structure of the $Cu2p_{3/2}$ X-ray photoelectron spectra of copper oxide based compounds 315
Correlation
Outer *ns*, *np* correlation satellites in the rare gases — A photoelectron spectrometry study with an undulator photon source 79
Coster–Kronig decay
The influence of Coster–Kronig decay processes on the relative intensities of 2s and 2p photoelectron lines of Si, P, S, Cl and Ca 67
Cu–Fe interface
Cu–Fe and Fe–Cu interfaces investigated by synchrotron radiation induced photoemission 23
$Cu2p_{3/2}$ XPS spectra
The fine structure of the $Cu2p_{3/2}$ X-ray photoelectron spectra of copper oxide based compounds 315
Cylindrical mirror analyser
Versailles Project on Advanced Materials and Standards study of intensity of cylindrical mirror analyser-based Auger electron spectrometers 345
Effect of the fringe field of one-dimensional aperture gratings on the transmission and focusing of the cylindrical mirror analyzer 271

DBr
High resolution X-ray excited inner valence photoelectron spectra of HBr and DBr 185
Dichroism
Linear and circular dichroism with soft X-rays 393
Direct transitions
Direct transition and matrix element effects in 2H-$NbSe_2$ 119

Electron donor–acceptor complexes
A photoelectron spectroscopic study of the electron donor–acceptor complexes of trimethylamine with boron trihalides $BX_3$ (X = F, Cl, Br) 129
Etched silicon surface
An X-ray photoelectron study of the dependence of HF concentration on an etched silicon surface 261

Fe-Cu interface
Cu-Fe and Fe-Cu interfaces investigated by synchrotron radiation induced photoemission 23
Fourth row hydrides
CI calculations of the inner and outer valence photoelectron spectra of the fourth row hydrides 375

Gold
The adsorption of alkanethiols on gold studied quantitatively by XPS inelastic background analysis 141
Green function
Shortcomings of separable representations of the Green function in multiple-scattering theory for photoelectron diffraction and extended X-ray absorption fine structure 299

HBr
High resolution X-ray excited inner valence photoelectron spectra of HBr and DBr 185
2H-$NbSe_2$
Direct transition and matrix element effects in 2H-$NbSe_2$ 119
Helium
$(e, 2e)$ ionization of helium leading to the $n=2$ final state under asymmetric Bethe-ridge conditions 17
Heterogeneous catalysts
Theoretical analysis of vibrational spectra of molecules adsorbed on the surface of heterogeneous catalysts 11
Hot-electron transport properties
Hot-electron transport properties of rare-gas solids derived from low-energy electron transmission experiments 33
Hückel calculations
Charge iterated parameters for extended Hückel calculations on polytetrafluoroethylene: relevance to X-ray photoelectron spectroscopy 365
Hyperquadratic plasmon dispersion
Hyperquadratic plasmon dispersion in indium R13

Indium
Hyperquadratic plasmon dispersion in indium R13

Krypton
The *K* and *LMX* Auger spectra of krypton from the $^{83}Rb$ decay 49

Magnesium
Theoretical investigation of the Auger spectra of Mg in different local atomic environments. Part 1. Magnesium and aluminium 199
Matrix element effects
Direct transition and matrix element effects in 2H-$NbSe_2$ 119
Metal carbonyl nitrosyls
Many-body calculation of the valence photoemission spectra of metal carbonyl nitrosyls 219
Mg-Pd alloys
Theoretical investigation of the Auger spectra of Mg in different local atomic environments. Part 2. Mg-Pd alloys 211
Multiplet splitting
Charge transfer satellite and multiplet splitting in X-ray photoemission spectra of late transition metal halides 325
Multiple-scattering theory
Shortcomings of separable representations of the Green function in multiple-scattering theory for photoelectron diffraction and extended X-ray absorption fine structure 299

Ni2p photoemission
A comment on "Final states after Ni2p photoemission in NiO" 75
NiO
A comment on "Final states after Ni2p photoemission in NiO" 75
Niobium carbonitride
Auger emission of valence band and local electronic structure of niobium carbonitride 247

Oxygen adsorption
XPS analysis of adsorption of oxygen molecules on the surface of Ti and $TiN_x$ films in vacuum 169
Oxygen-containing compounds
The use of the oxygen Auger parameters in the characterisation of oxygen-containing compounds 105

Pd clusters
Auger parameter of small Pd clusters in a zeolite matrix: experimental investigation and application of a simple electrostatic model R1
Pd-Si interface
XPS study of light-induced effects on Pd-Si and Pd-$SiO_2$-Si interfaces 233
Pd-$SiO_2$-Si interface
XPS study of light-induced effects on Pd-Si and Pd-$SiO_2$-Si interfaces 233
Photoelectron lines
The influence of Coster-Kronig decay processes on the relative intensities of 2s and 2p photoelectron lines of Si, P, S, Cl and Ca 67
Polytetrafluoroethylene
Charge iterated parameters for extended Hückel calculations on polytetrafluoroethylene: relevance to X-ray photoelectron spectroscopy 365

Rare gases
Outer *ns*, *np* correlation satellites in the rare gases - A photoelectron spectrometry study with an undulator photon source 79
Rare-gas solids
Hot-electron transport properties of rare-gas solids derived from low-energy electron transmission experiments 33
$^{83}$Rb decay
The *K* and *LMX* Auger spectra of krypton from the $^{83}$Rb decay 49

Satellites
Outer *ns*, *np* correlation satellites in the rare gases - A photoelectron spectrometry study with an undulator photon source 79

Ti films
XPS analysis of adsorption of oxygen molecules on the surface of Ti and $TiN_x$ films in vacuum 169
Titanium
XPS study of the nitrides, oxides and oxynitrides of titanium 1
$TiN_x$ films
XPS analysis of adsorption of oxygen molecules on the surface of Ti and $TiN_x$ films in vacuum 169
Transition metal halides
Charge transfer satellites and multiplet splitting in X-ray photoemission spectra of late transition metal halides 325
Trimethylamine
A photoelectron spectroscopic study of the electron donor-acceptor complexes of trimethylamine with boron trihalides $BX_3$ (X = F, Cl, Br) 129

Vibrational spectra
Theoretical analysis of vibrational spectra of molecules adsorbed on the surface of heterogeneous catalysts 11

Zeolite matrix
Auger parameter of small Pd clusters in a zeolite matrix: experimental investigation and application of a simple electrostatic model R1
Zeolite-supported catalysts
Biomodal particle size distribution and surface segregation of zeolite-supported catalysts from XPS data 285
